# PROCEEDINGS

OF THE

## ROYAL SOCIETY OF EDINBURGH.

SESSION 1866-67.

---

### CONTENTS.

*Monday, 3d December 1866.*

	PAGE
Opening Address. Session 1866-67. By Sir DAVID BREWSTER, President,	2
Donations to the Library,	37

*Monday, 17th December 1866.*

Influence of Marriage on the Death-Rates of Men and Women in Scotland. By JAMES STARK, M.D., &c.,	49
On the Physiological Action of the Calabar Bean ( <i>Physo stigma venenosum</i> , Balf.) By THOMAS R. FRASER, M.D.	51
On some Phenomena of Indistinct Vision. By EDWARD SANG, Esq.,	58
Donations to the Library,	61

*Monday, 7th January 1867.*

Experiments by Dr HUGHES BENNETT,	63
-----------------------------------	----

*Monday, 21st January 1867.*

On the Colours of the Soap-Bubble. By Sir DAVID BREWSTER, K.H., F.R.S.,	64
On the <i>Musculus Sternalis</i> . By WILLIAM TURNER, M.B., Demonstrator of Anatomy,	65
On Compensation Pendulums of two Pieces. By EDWARD SANG, Esq.,	67
Donations to the Library,	70

[Turn over.

*Monday, 4th February 1867.*

	PAGE
On the Tertiary Volcanic Rocks of the British Islands. By ARCHIBALD GEIKIE, Esq., F.R.S., . . . . .	71
Note on the Action of Ammonia on Dichloracetone. By Dr A. CRUM BROWN, . . . . .	75
On the Figures of Equilibrium of Liquid Films. By Sir DAVID BREWSTER, K.H., F.R.S., . . . . .	76
On a Method of ascertaining the Specific Gravity of Water which holds a minute quantity of Foreign Matter in Solution; or, on the Specific Gravity of Impure Water. By EDWARD SANG, Esq., . . . . .	78
On the Oxidation of Phenyl Alcohol, and a Mechanical Arrangement adapted to illustrate Structure in the Non-saturated Hydrocarbons. By J. DEWAR, Esq. Communicated by Professor Playfair, . . . . .	82
Donations to the Library, . . . . .	86

*Monday, 18th February 1867.*

On an Application of Mathematics to Chemistry. By Dr A. CRUM BROWN, . . . . .	89
Notice of an Easy Method of Preparing Nitroprussides. By Dr LYON PLAYFAIR, F.R.S., . . . . .	90
Note on the Reality of the Roots of the Symbolical Cubic which expresses the Properties of a Self-conjugate Linear and Vector Function. By Professor TAIT, . . . . .	92
On Vortex Atoms. By Professor Sir WILLIAM THOMSON, . . . . .	94
Donations to the Library, . . . . .	105

*Monday, 4th March 1867.*

On the Arctic Shell Clay of Elie and Errol, viewed in connection with our other Glacial and more Recent Deposits. By the Rev. THOMAS BROWN, F.R.S.E., . . . . .	107
On the Motions and Colours upon Films of Alcohol, Volatile Oils, and other Fluids. By Sir DAVID BREWSTER, K.H., F.R.S., &c., . . . . .	108
Note on the Action of Nitric Oxide, Nitrous Acid, and Nitrites on Hæmoglobin. By ARTHUR GAMGEE, M.D., F.R.S.E., F.C.S., . . . . .	109
Antiquities, Scenery, &c., of Cambodia, illustrated by a series of Photographs, shown by the Oxyhydrogen Light. By J. THOMSON, Esq., F.R.G.S. Commu- nicated by Professor Sir J. Y. SIMPSON, Bart., . . . . .	112
Donations to the Library, . . . . .	112

*For continuation of Contents, see pp. 3 and 4 of Cover.*

PROCEEDINGS  
OF  
THE ROYAL SOCIETY  
OF  
EDINBURGH.

VOL. VI.

NOVEMBER 1866 TO MAY 1869.

EDINBURGH:  
PRINTED BY NEILL AND COMPANY.

MDCCCLXIX.

## CONTENTS.

---

Opening Address, Session 1866-67. By Sir David Brewster, President, . . . . .	2
Donations to the Library, . . . . .	37
Influence of Marriage on the Death-Rates of Men and Women in Scotland. By James Stark, M.D., . . . . .	49
On the Physiological Action of the Calabar Bean ( <i>Physostigma vene-</i> <i>nosum</i> , Balf.) By Thomas R. Fraser, M.D., . . . . .	51
On some Phenomena of Indistinct Vision. By Edward Sang, Esq., . .	58
Donations to the Library, . . . . .	61
Experiments on Animal Electricity. By Dr Hughes Bennet, . . . .	63
On the Colours of the Soap-Bubble. By Sir David Brewster, K.H., F.R.S., . . . . .	64
On the <i>Musculus Sternalis</i> . By William Turner, M.B., Demonstra- tor of Anatomy, . . . . .	65
On Compensation Pendulums of two Pieces. By Edward Sang, Esq., .	67
Donations to the Library, . . . . .	70
On the Tertiary Volcanic Rocks of the British Islands. By Archibald Geikie, Esq., F.R.S., . . . . .	71
Note on the Action of Ammonia on Dichloracetone. By Dr A. Crum Brown, . . . . .	75
On the Figures of Equilibrium of Liquid Films. By Sir David Brewster, K.H., F.R.S., . . . . .	76
On a Method of ascertaining the Specific Gravity of Water which holds a minute quantity of Foreign Matter in Solution; or, on the Specific Gravity of Impure Water. By Edward Sang, Esq., . . . .	78
On the Oxidation of Phenyl Alcohol, and a Mechanical Arrangement adapted to illustrate Structure in the Non-saturated Hydrocarbons. By J. Dewar, Esq. Communicated by Professor Playfair, . . . .	82
Donations to the Library, . . . . .	86
On an Application of Mathematics to Chemistry. By Dr A. Crum Brown, . . . . .	89
Notice of an Easy Method of Preparing Nitroprussides. By Dr Lyon Playfair, F.R.S., . . . . .	90
Note on the Reality of the Roots of the Symbolical Cubic which ex- presses the Properties of a Self-conjugate Linear and Vector Func- tion. By Professor Tait, . . . . .	92
On Vortex Atoms. By Professor Sir William Thomson, . . . . .	94
Donations to the Library, . . . . .	105
On the Arctic Shell Clay of Elie and Errol, viewed in connection with our other Glacial and more Recent Deposits. By the Rev. Thomas Brown, . . . . .	107

On the Motions and Colours upon Films of Alcohol, Volatile Oils, and other Fluids. By Sir David Brewster, K.H., F.R.S., &c.,	108
Note on the Action of Nitric Oxide, Nitrous Acid, and Nitrites on Hæmoglobin. By Arthur Gamgee, M.D.,	109
Antiquities, Scenery, &c., of Cambodia, illustrated by a series of Photographs, shown by the Oxyhydrogen Light. By J. Thomson, Esq., F.R.G.S. Communicated by Professor Sir J. Y. Simpson, Bart.,	112
Donations to the Library,	112
On the Application of Relative, or Proportional, Equality to International Organisation. By Professor Lorimer,	113
On the Sophists of the Fifth Century, B.C. By Professor Blackie,	119
An Account of some peculiarly-shaped Mineral Concretions found near Carlisle. By Henry Barnes, M.D. Communicated by Sir David Brewster,	120
Note on Professor Tait's "Quaternion Path" to Determinants of the Third Order. By the Rev. Hugh Martin, M.A. Communicated by Professor Kelland,	121
Donations to the Library,	125
On the Analysis of Compound Ethers. By W. Littmar, Esq.,	126
On a Derivative of Meconic Acid. By Messrs James Dewar and William Dittmar,	129
On the Action of Ammonia on Dichloracetone. By Dr A. Crum Brown,	133
On Centres, Faisceaux, and Envelopes of Homology. By Rev. Hugh Martin, M.A. Communicated by Professor Kelland,	134
On the Effect of Pressure upon Rock Salt and Iceland Spar. By M. Reusch, Professor of Natural Philosophy in the University of Tübingen. Communicated by Sir David Brewster,	134
Donations to the Library,	139
On the Nature and Character of European Winter Storms, with the best means of giving Warning of their Approach. By R. Russell, Esq.,	140
On the Vapour Lines in the Spectrum. By Sir David Brewster, K.H., F.R.S.,	145
On the Radiant Spectrum. By Sir David Brewster, K.H., F.R.S.,	147
On the Vibration of a Uniform Straight Spring. By Edward Sang, Esq.,	150
Donations to the Library,	156
Description of a Double and Triple Holophote, and of a Method of Introducing the Electric and other Lights. By Sir David Brewster, K.H., F.R.S.,	157
On the Effect of Reduction of Temperature on the Coagulation of the Blood. By John Davy, M.D., F.R.SS. Lond. and Edin.,	157
Note on a former Paper on the Theory of Double Refraction. By A. R. Catton, M.A., Fellow of St John's College, Cambridge,	159
A Preliminary Notice of the Akazga Ordeal of West Africa, and of its Active Principle. By Thomas R. Fraser, M.D.,	159

# CONTENTS.

v

On a Lower Limit to the Power exerted in the Function of Parturition. By J. Matthews Duncan, M.D., . . . . .	163
Some Mathematical Researches. By H. Fox Talbot, Esq., . . . . .	165
On the Small Oscillations of Heterogeneous Interpenetrating Systems of Particles, which act upon each other according to Laws dependent only on their Mutual Distances. By A. R. CATTON, M.A., Fellow of St John's College, Cambridge, . . . . .	165
Note on a celebrated Geometrical Problem. By Professor Tait, . . . . .	165
On Vortex Motion. By Professor Sir William Thomson, . . . . .	167
Note on the Radiant Spectrum. By Professor Tait, . . . . .	167
Note upon a Method of varying Weights by Minute Quantities. By J. A. Broun, F.R.S., . . . . .	167
On the Diurnal Variation of the Magnetic Declination near the Magnetic Equator, and in both Hemispheres. By John Allan Broun, F.R.S., late Director of the Observatory of His Highness the Maharajah of Travancore, G.C.S.I., at Trevandrum, . . . . .	168
Opening Address, Session 1867-68. By Sir David Brewster, President. Communicated by Professor Kelland, . . . . .	174
Donations to the Library, . . . . .	205
On Polyzomal Curves, &c. By Professor Cayley. Communicated by Professor Tait, . . . . .	217
Note on the Hodograph. By Professor Tait, . . . . .	221
On the Antiquity of Intellectual Man : from a Practical and Astronomical point of view. By Professor C. Piazzi Smyth, . . . . .	226
On the Changes produced by direct Chemical Addition on the Physiological Action of certain Poisons. By Drs A. Crum Brown and Thomas R. Fraser, . . . . .	228
On the Burning Mirrors of Archimedes, and on the Concentration of Light produced by Reflectors. By John Scott, Esq. Communicated by Professor Kelland, . . . . .	232
On the Great Pyramid of Gizeh, and Professor C. P. Smyth's Views concerning it. By A. D. Wackerbarth, A.M., of Upsala. Communicated by Professor Kelland, . . . . .	235
On the best Arrangement for producing a Pure Spectrum on a Screen. By J. Clerk Maxwell, M.A., F.R.SS. L. & E., . . . . .	238
Pyramidal Structures in Egypt and elsewhere; and the Objects of their Erection. By Sir J. Y. Simpson, Bart., . . . . .	243
Note on the Occasional Occurrence of the Musculus Rectus Thoracis in Man. By Professor Turner, . . . . .	268
Address, at the request of the Council, delivered by the Rev. H. B. Tristram on the Recent Scientific Researches in Palestine, . . . . .	271
Obituary Notices. By Professor Playfair, . . . . .	282
Observations relative to the desirableness of transporting from Alexandria to Britain the prostrate Obelisk presented to George IV. by Mahomed Ali Pacha. By Colonel Sir J. E. Alexander, K.C.L.S., . . . . .	284

On the Temperature of the Common Fowl ( <i>Gallus domesticus</i> ). By the late Dr John Davy. Communicated by Professor Allman,	288
Note on an Inequality. By Professor Tait,	292
Observations on the Spores of Cryptogamic Plants, and on the Reproductive Process in some Algæ and Fungi. By Professor Balfour,	294
Note on a Recent High Tide on the East Coast of Britain. By George Robertson, M. Inst. C.E. ( <i>Plate</i> ),	296
The Mean Pressure of the Atmosphere over the Globe for the Months and for the Year. Part I.—January, July, and the Year. By Alexander Buchan, M.A., Secretary to the Scottish Meteorological Society,	303
On the History of the Sun's Distance Determinations; and on Scriptural and Scientific Probabilities. By William Petrie, Esq. Communicated by Professor C. Piazzi Smyth,	307
Physical Proof that the Geometric Mean of any Number of Quantities is less than the Arithmetic Mean. By Professor Tait,	309
On the Dissipation of Energy. By Professor Tait,	309
On the Flow of Solids, with Practical Application in Forgings, &c. By M. Tresca, Sub-Director of the Conservatoire des Arts et Metiers, Paris. Communicated by T. C. Archer, Esq.,	311
On the Figures of Equilibrium of Liquid Films. By Sir David Brewster,	311
Notice of Works designed by Sir Charles Hartley, C.E., for the Improvement of the Danube. By David Stevenson, Civil Engineer,	313
Remarks on two Pyramid Papers in the last published number of the "Proceedings" of the Royal Society of Edinburgh. By Professor C. Piazzi Smyth,	316
On the Products of the Destructive Distillation of Animal Substances. Part V.—Action of Sodium on Pyridine. By Professor Anderson, Glasgow,	379
On the Structure of the British Nemerteans; and new British Annelids. By W. Carmichael M'Intosh, M.D., F.L.S.,	379
Donations to the Library,	379
Opening Address, Session 1868-69. By Professor Christison,	392
On the Colour of Aerial Blue. By Sir George Harvey,	430
On the Rotation of a Rigid Body about a Fixed Point. By Professor Tait,	430
An Investigation into some previously undescribed Tetanic Symptoms produced by Atropia in Cold-Blooded Animals. By Dr Thomas R. Fraser,	434
On <i>Rhabdopleura</i> , a New Genus of Polyzoa. By Professor Allman,	438
Donations to the Library,	440
Notice of a Heart in which the Superior Vena Cava possessed a Valve at its Auricular Orifice. By Professor Turner,	455
On the Motion of a Pendulum affected by the Rotation of the Earth and other Disturbing Causes. By Professor Tait,	458
On the Connection between Chemical Constitution and Physiological Action,	461

On the Physiological Action of the Salts of the Ammonium Bases derived from Atropia and Conia. By Dr A. Crum Brown and Dr Thomas R. Fraser, . . . . .	461
Note on the Determination of Heights, chiefly in the Interior of Continents, from Observations of Atmospheric Pressure. By Alexander Buchan, M.A., Secretary of the Scottish Meteorological Society, . . . . .	465
Notice of a Remarkable Mirage observed in the Firth of Forth. By Professor Christison, . . . . .	472
Minute of Council on the Death of Principal Forbes, . . . . .	476
Practical Note on Intensified Gravity in Centrifugal Governors. By Professor C. Piazzi Smyth, . . . . .	477
Mr Mill's Theory of Geometrical Reasoning Mathematically tested. By W. R. Smith, Esq., Assistant to the Professor of Natural Philosophy. Communicated by Professor Tait, . . . . .	477
Note on Captain A. Moncrieff's System of working Artillery. By R. W. Thomson, Esq., C.E., . . . . .	485
Note on an undescribed variety of Flexible Sandstone. By T. C. Archer, Esq., . . . . .	485
Address on the Progress of the Geological Survey of Scotland. By Archd. Geikie, Esq., . . . . .	487
On Traces in the Adult Heart of its Transitions in form during Fœtal Life. By P. D. Handyside, M.D., ( <i>with a Plate</i> ), . . . . .	499
An Account of the Anthropoid Apes, chiefly with reference to Specimens recently acquired by the Edinburgh Museum of Science and Art. By Professor Allman, . . . . .	501
Motion of a Palladium Plate during the formation of Graham's Hydrogenium. By James Dewar, Esq., . . . . .	504
Some Observations on Free, An-atomic, or Transmissible Power. By R. S. Wyld, Esq., . . . . .	512
On the Practical Application of Reciprocal Figures to the Calculation of Strains on Framework. By Professor Fleeming Jenkin, . . . . .	516
On a New Synthesis of Ammonia. By A. R. Catton, Esq., late Fellow, and P. T. Main, Esq., Fellow of St John's College, Cambridge, . . . . .	516
On the Present State of the Sun's Distance Question— <i>continued</i> . By W. Petrie, Esq. Communicated by Professor C. Piazzi Smyth, . . . . .	517
On Chemical Structure. By Dr A. Crum Brown, . . . . .	518
Observations on the Temperature of Newly-born Children. By T. J. MacLagan, M.D., Dundee. Communicated by J. Matthews Duncan, . . . . .	519
On the Growth, Development, and Situation of the Human Fœtal Heart. By Professor Macdonald, . . . . .	519
The Mean Pressure of the Atmosphere, and the Prevailing Winds for the Months and for the Year. Part II. By Alexander Buchan, M.A., Secretary of the Meteorological Society, . . . . .	523
On the Rectangular Current Theory of Storms, illustrated by two Storms which passed over the United States, from the 13th to 19th March 1869. By Robert Russell, Esq., . . . . .	525
On the Boulder-Clay of Europe. By D. Milne-Home, Esq., . . . . .	529

On the Development of the Flower of <i>Pinguicula vulgaris</i> , L., with Remarks on the Embryos of <i>P. vulgaris</i> , <i>P. grandiflora</i> , <i>P. lusitana</i> , <i>P. caudata</i> , and <i>Utricularia minor</i> . By Alexander Dickson, M.D., Edinburgh and Dublin, Regius Professor of Botany in the University of Glasgow,	531
Observations on New Lichenicolous Micro-Fungi. By Dr W. Lauder Lindsay,	534
On the Theory of the Formation of Ammonia when Nitrogen and Aqueous Vapour are passed over Magnesium. By A. R. Catton, M.A.,	536
Influence of the Vagus upon the Vascular System. By William Rutherford, M.D., Demonstrator of Practical Physiology in the University of Edinburgh,	538
On Free An-atomic or Transmissible Power. By R. S. Wyld, Esq. ( <i>Second Paper</i> ),	539
On the Affinities and Classification of the Nemerteans. By W. C. McIntosh, M.D.,	545
On the Alkaloids contained in the Wood of the Bebeeru or Greenheart Tree ( <i>Nectandra Rodiei</i> , Schomb.) By Douglas MacLagan, M.D., F.R.S.E., Professor of Medical Jurisprudence in the University of Edinburgh, and Arthur Gamgee, M.D.,	548
On the Basin of the Firth of Forth, and some of its Geological Phenomena. By David Milne-Home, Esq.,	550
On Comets. By Professor Tait,	553
Hegel and the Metaphysics of the Fluxional Calculus. By W. R. Smith, Esq. Communicated by Professor Tait,	555
On the Connection between Chemical Constitution and Physiological Action:—On the Physiological Action of the Salts of Ammonia, of Tri-methylamine, and of Tetra-methyl-ammonium; of the Salts of Tropia, and of the Ammonium Bases derived from it; and of Tropic, Atropic, and Isatropic Acids and their Salts. With further details on the Physiological Action of the Salts of Methyl-Strychnium and of Ethyl-Strychnium. By Professor A. Crum Brown and Dr Thomas R. Fraser,	556
On the Annual Range of Temperature over the Globe. By Mr Keith Johnston, jun. Communicated by Mr Buchan, Secretary of the Scottish Meteorological Society ( <i>with a Plate</i> ),	561
Note on Electrolytic Polarisation. By Professor Tait,	579
On the Causes of Volcanic Action. By Joseph John Murphy, Esq. Communicated by Dr Wyville Thomson,	583
Preliminary Note on the Antagonism between the Actions of Physostigma (Calabar Bean) and Belladonna. By Dr Thomas R. Fraser,	587
On the Thermal Energy of Molecular Vortices. By W. J. Macquorn Rankine, C.E., LL.D., F.R.SS. Lond. and Edin.,	590
On the Rotation of a Rigid Body round a Fixed Point. Part II. By Professor Tait,	592
Donations to the Library,	592
